

# Studley Parish Council

## Tree Maintenance Policy

In order to fulfil its obligations towards the public, the Council will carry out regular inspections and maintain trees owned by the Parish Council in a reasonably healthy condition; this will generally include:

- Removing dead, dying, or dangerous trees;
- Removing major dead wood where it overhangs private property;
- Removing dangerous or damaged branches;
- Pruning branches where an actionable legal nuisance is being caused e.g. over footpaths/roads, or where there is a risk of damage to structures.

The Council does not, as a matter of routine, undertake to prune back or remove trees or overhanging branches other than for public safety or to abate an actionable nuisance.

It therefore does not generally:

- Prune or fell trees to improve light to a property;
- Prune or fell trees to improve the view to a property;
- Systematically crown reduce or 'top' trees;
- Prune or fell trees with regard to seasonal nuisance (leaf letter, honey dew etc).

However, the Council wishes to act in a reasonable manner towards its neighbours and will consider requests and suggestions from residents on an individual basis.

In addition, the Council will take into account budgetary considerations and the need to give priority to works identified in tree condition reports as needing to be undertaken for reasons of safety.
